ABOUT TECHTRONICS SOLUTIONS

Techtronics Solutions is a leading name in the domain of IT services specializing in IT Infrastructure. In a short span of time, the company has been able to carve a mark for itself in the industry especially because of an impeccable team of twenty-eight highly experienced and efficient experts. Commitment and trust being the two biggest pillars of TTS, it stands tall in its quality standards towards IT infrastructure products and services. TTS boosts to offer seamless services and product quality which are consistent with global quality standards. Catering to a wide range of business segments, we excel in providing world class quality with an affordable range with highest value to create long term relationship of trust and excellence.

Techtronics Solutions has successfully configured, installed, commissioned, and extended support to a wide range of IT infrastructural set Ups These included installation of appropriate hardware and software making the entire local area network operational, Installation of authenticated security systems and web solutions with designing & development.

Vision- "IT Products and services should be liberated and looked beyond mere boxes and people" To achieve this, we aim to-

Strengthen consumer commitment- TTS has devised technology to understand the exact customer need with a deeper insight on meeting their expectations, thereby delivering services par excellence.

Market leader- TTS aims to retain its position as market leaders for the longest of time by delivering global quality products and services and enhancing levels of customer satisfaction. Power of Human Resource- TTS would position itself as one of the best places to work with by recruiting, nurturing, and retaining the "right" people to make it the "right" place to work.

Have a strong review system- TTS works towards a strong and robust review system thereby accelerating development of the key processes of the organization. This would lead to innovation and flexible policy measures which could be brought about at the lowest possible cost.
